

MEMORANDUM

CONFIDENTIAL

DATE: August 22, 1997
TO: Jim Lynskey, Mike O'Donnell and Tim Ryan, Ogden Facility Management
FROM: Nira Yamachika
SUBJECT: Jet Jam 97 WQ Testing: Transfer of Water to District Facility

Jim, Mike and Tim:

The samples collected today at the 3 designated stations within the Jet Jam ski impounded water pond have been analyzed for volatile organics. All constituents are non-detect (data appended). OCWD authorizes Ogden to commence transfer of the impounded water to the District's designated recharge basin as soon as I verify the initial meter reading. I will be meeting Wayne (Rain-for-Rent) at Burris Pit this evening and advise he may commence pumping.

Thank you for your letter regarding the "cleanliness" of the pipeline system.
